

A unifying VISION for Wilderness

Well, here it is—by unanimous vote! Every single response we received was for version C of the three Vision statements put forward in the last newsletter.

So what now?

A Vision sums up our **ideal**... it reflects the life we **want** to enjoy... secure, caring and passionate about this beautiful place we call home.

But words alone cannot ensure an ideal life-style—**we need to ensure we live up to our aspirations!**

To be a secure community, we need to ensure our security systems are all they should be, apply all the great advice given at the Police Forum meetings and keep an eye on our streets and neighbours...

To be a caring community, we need to enjoy helping others, volunteering, supporting good causes and give a helping hand to those in need. Let's drive more considerately, put our garbage out only when we should—and let's and be kind to one and all!

To show our passion for the environment let's clean up our beach and street verges, pull out weeds when on our walks, respect our wildlife, get rid of all invasive alien plants collect rainwater, recycle our waste, and definitely NOT toss garden waste onto empty erven!

To make the most of our unhurried village lifestyle, we need to support responsible development, support local businesses that add to our village ambiance and welcome appreciative visitors (without whom our businesses would not be able to provide much needed employment to our community members.)

**So its up to each one of us to embrace this vision, enjoy living it
and bringing it into being!**
